

VITAMIN-E-COMPLEX

Providing All 8 Members of the Vitamin E Family

Why use Vitamin-E-Complex? Vitamin E is one of the single most important antioxidants and is considered to be the master vitamin that provides nutritional support to the lipid portions of our cells, such as the cell membranes.[◇]

Vitamin E helps nutritionally support red blood cells that carry oxygen to tissues and organs throughout the body. It is an antioxidant that helps support the nervous, cardiovascular and circulatory systems.[◇]

The Lifeplus Vitamin-E-Complex contains all eight isomers that constitute the natural vitamin E family (4 forms of vitamin E and 4 forms of tocotrienols) in ratios similar to those found in nature.

Supplement Facts
